## **The British Carrier Strike Fleet: After 1945** David Hobbs

David Hobbs looks at the post-World War II fortunes of the most powerful fleet in the Royal Navy--its decline in the face of diminishing resources, its final fall at the hands of ignorant politicians, and its recent resurrection in the form of the *Queen Elizabeth* class carriers, the largest ships ever built for the Royal Navy. Despite prophecies that nuclear weapons would make conventional forces obsolete, British carrier-borne aircraft were almost continuously employed. This book combines narratives of poorly understood operations with clear analysis of their strategic and political background. With beautiful illustrations and original research, *British Carrier Strike Fleet* tells an important but largely untold story of renewed significance as Britain once again embraces carrier operation.
