XploRe: An Interactive Statistical Computing Environment (Statistics and Computing) Wolfgang Härdle, Sigbert Klinke, Berwin Turlach

This book describes an interactive statistical computing environment called XploRe. As the name suggests, support for exploratory statistical analysis is given by a variety of computational tools. XploRe is a matrix-oriented statistical language with a comprehensive set of basic statistical operations that provides highly interactive graphics, as well as a programming environment for user-written macros; it offers hard-wired smoothing procedures for effective high-dimensional data analysis. Its highly dynamic graphic capabilities make it possible to construct student-level front ends for teaching basic elements of statistics. Hot keys make it an easy-to-use computing environment for statistical analysis. The primary objective of this book is to show how the XploRe system can be used as an effective computing environment for a large number of statistical tasks. The computing tasks we consider range from basic data matrix manipulations to interactive customizing of graphs and dynamic fitting of high-dimensional statistical models. The XploRe language is similar to other statistical languages and offers an interactive help system that can be extended to user-written algorithms. The language is intuitive and readers with access to other systems can, without major difficulty, reproduce the examples presented here and use them as a basis for further investigation.

From reader reviews:

Nicholas Walsh:

The book XploRe: An Interactive Statistical Computing Environment (Statistics and Computing) can give more knowledge and also the precise product information about everything you want. Why must we leave the best thing like a book XploRe: An Interactive Statistical Computing Environment (Statistics and Computing)? A number of you have a different opinion about reserve. But one aim that book can give many details for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or data that you take for that, you can give for each other; it is possible to share all of these. Book XploRe: An Interactive Statistical Computing Environment (Statistics and Computing) has simple shape but the truth is know: it has great and big function for you. You can appear the enormous world by open up and read a reserve. So it is very wonderful.

Shirley Daniels:

Reading can called head hangout, why? Because if you find yourself reading a book especially book entitled XploRe: An Interactive Statistical Computing Environment (Statistics and Computing) your brain will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely will end up your mind friends. Imaging every single word written in a publication then become one web form conclusion and explanation which maybe you never get ahead of. The XploRe: An Interactive Statistical Computing Environment (Statistics and Computing) giving you an additional experience more than blown away your mind but also giving you useful facts for your better life with this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will probably be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary spending spare time activity?

Thelma Olivares:

Are you kind of active person, only have 10 or perhaps 15 minute in your morning to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your small amount of time to read it because this time you only find guide that need more time to be learn. XploRe: An Interactive Statistical Computing Environment (Statistics and Computing) can be your answer because it can be read by anyone who have those short free time problems.

Ophelia Ellis:

A lot of e-book has printed but it is different. You can get it by world wide web on social media. You can choose the best book for you, science, amusing, novel, or whatever simply by searching from it. It is named of book XploRe: An Interactive Statistical Computing Environment (Statistics and Computing). You can add your knowledge by it. Without departing the printed book, it might add your knowledge and make an individual happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination for a other place.
