Sustainable Strategic Management

Jean Garner Stead, W Edward Stead

Sustainable Strategic Management Jean Garner Stead, W Edward Stead

Sustainable strategic management (SSM) involves analysing, formulating, and implementing business strategies that are economically competitive, socially responsible, and in balance with the cycles of nature. SSM has emerged from the coevolutionary interactions of business organisations with the society they serve and the planet they call home. SSM strategic portfolios allow organisations to create competitive advantages by serving as agents of social change and ecological protection.

This book has been specifically written as a text for traditional graduate and undergraduate strategic management courses, and its short length makes appropriate as a supplementary text in these courses as well. The authors have structured the book to follow the standard strategic management process, and they have included an ongoing descriptive case on Eastman Chemical Company designed to provide an in-depth example of the concepts presented in the chapters.

From creating organisational visions and missions, to formulating, implementing, and evaluating goals and strategies, this book provides readers with new ways of thinking about their organisation's strategic role in the greater society and ecosystem now and in the future.
