This report highlights the results of a study of Network Centric Operations (NCO) as executed by V Corps and the 3rd Infantry Division (Mechanized), (3 ID (M)), during the major offensive combat operations of Operation Iraqi Freedom (OIF) from March 2003 through April 2003. The U.S. V Corps was the senior U.S. Army tactical headquarters responsible for operations conducted primarily along and to the west of the Euphrates River, to include the seizure of Baghdad. At the onset of the campaign (crossing the Kuwait-Iraq border) 3 ID (M) was the only ground maneuver force available to V Corps and continued as the corps' main effort through the seizure of Baghdad.
