## Robotics Research: The Ninth International Symposium

The Seventh International Symposium of Robotics Research was held in Herrsching near Munich, Germany, from October 21 to 24, 1995, the first to be organized following the renewal undergone by the International Foundation of Robotics Research (IFRR) during the preceding Symposium (Hidden Valley, October 1993). A board of eighteen officers was appointed: Suguru Arimoto (Tokyo University) Ruzena Bajcsy (University of Pennsylvania) Robert Bolles (SRI International) Mike Brady (Oxford University) Paolo Dario (Pisa University, Italy) Joris De Schutter (Katholieke Universiteit Leuven, Belgium) Olivier Faucher (INRIA, France) Georges Giralt (LAAS-CNRS, France), Secretary Gerd Hirzinger (DFVLR, Germany) Hirochika Inoue (Tokyo University), President-elect Ray Jarvis (Monash University, Australia) Takeo Kanade (Carnegie Mellon University) Hirofumi Miura (Tokyo University) Richard Paul (University of Pennsylvania), President Marc Raibert (Massachusetts Institute of Technology) Bernie Roth (Stanford University) Yoshiaki Shirai (Osaka University) Tsuneo Yoshikawa (Kyoto University) It was our commitment to bring together active, leading robotics researchers from academia, government, and industry, with the ambitious objective to assess the state of Advanced Robotics and to discuss future research directions. Papers representing authoritative reviews of established research areas as well as papers reporting on new areas were sought for presentation. A number of leading researchers were asked to submit extended abstracts outlining papers representing their areas of research. In addition to inviting participants, a call for papers was issued in order to include researchers who had made significant new contributions to robotics.

### From reader reviews:

#### **Robert Prather:**

Book is written, printed, or created for everything. You can understand everything you want by a reserve. Book has a different type. As we know that book is important matter to bring us around the world. Alongside that you can your reading proficiency was fluently. A e-book Robotics Research: The Nineth International Symposium will make you to become smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think in which open or reading a new book make you bored. It is far from make you fun. Why they can be thought like that? Have you in search of best book or ideal book with you?

#### **Arlene Martin:**

Do you like reading a guide? Confuse to looking for your selected book? Or your book has been rare? Why so many question for the book? But just about any people feel that they enjoy intended for reading. Some people likes examining, not only science book but in addition novel and Robotics Research: The Nineth International Symposium or others sources were given information for you. After you know how the truly amazing a book, you feel desire to read more and more. Science publication was created for teacher as well as students especially. Those textbooks are helping them to add their knowledge. In different case, beside science e-book, any other book likes Robotics Research: The Nineth International Symposium to make your spare time much more colorful. Many types of book like this one.

#### **Grady Long:**

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful pictures on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Robotics Research: The Nineth International Symposium can make you truly feel more interested to read.

#### **Ricardo Kiernan:**

Reading a guide make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is created or printed or created from each source which filled update of news. In this particular modern era like at this point, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just seeking the Robotics Research: The Nineth International Symposium when you necessary it?
