Gold Nanoparticles for Physics, Chemistry and Biology

Catherine Louis, Olivier Pluchery

Gold Nanoparticles for Physics, Chemistry and Biology Catherine Louis, Olivier Pluchery

The fascination with gold is a story which spans millennia, however scientists have recently found a new interest for gold when it is divided into miniscule grains, such as gold nanoparticles. This scientific enthusiasm started in various fields of science in the middle of the 1980s and the present book offers a panorama of the major scientific achievements obtained with gold nanoparticles.

Various topics are reviewed such as: gold nanoparticle preparation methods, their plasmon resonance and thermo-optical properties, their catalytic properties, their use in biology and medicine as well as their possible toxicity and, finally, their future technological applications. The book also contains an in-depth study of the use of gold nanoparticles throughout the ages, starting from times where the concept of nanoparticles was beyond the realm of human imagination. All these topics are presented by world-class scientists within a set of self-contained chapters.

This book may be used as an advanced textbook by graduate students and scientists who need an introduction to gold nanoparticles. It is also suitable for experts in the related areas of chemistry, biology, material science, optics and physics, who are interested in broadening their knowledge and who wish to have an overview of the subject. Each chapter gradually leads the reader from the basics of a topic towards some of the current scientific challenges in the area. The necessary background material to achieve a solid understanding of each topic and the scientific literature to go further in the field is provided.

Readership: Graduate students, young scientists and experts in related areas of chemistry, biology, material science and physics who need an introduction to gold nanoparticles.

From reader reviews:

Homer Smith:

What do you with regards to book? It is not important together with you? Or just adding material when you really need something to explain what your own problem? How about your time? Or are you busy individual? If you don't have spare time to perform others business, it is make one feel bored faster. And you have time? What did you do? Every individual has many questions above. They have to answer that question because just their can do this. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this specific Gold Nanoparticles for Physics, Chemistry and Biology to read.

Janet Warren:

You could spend your free time to learn this book this guide. This Gold Nanoparticles for Physics, Chemistry and Biology is simple to bring you can read it in the area, in the beach, train along with soon. If you did not have got much space to bring the particular printed book, you can buy typically the e-book. It is make you simpler to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Lisa Keener:

Is it you actually who having spare time in that case spend it whole day simply by watching television programs or just resting on the bed? Do you need something totally new? This Gold Nanoparticles for Physics, Chemistry and Biology can be the respond to, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Lillian Kea:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person just like reading or as reading through become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You discover good news or update in relation to something by book. Numerous books that can you go onto be your object. One of them is actually Gold Nanoparticles for Physics, Chemistry and Biology.
