Immobilization of Cells (Biotechnology Monographs)

Colin R. Phillips, Yiu Cheong Poon

Immobilization of Cells (Biotechnology Monographs) Colin R. Phillips, Yiu Cheong Poon

Growth of immobilized cells can be viewed as an alternative to growth of free cells in many instances. In others, immobilization confers a precision of control over the process not possible in free growth.

Immobilization of cells can sometimes be considered to be a lower cost alternative to immobilization of enzymes. In this volume, immobilization procedures based on mechanical means and bonding of various types are examined, with detailed application examples. These applications include microorganisms, plant and animal cells, sub-cellular organelles and multiple enzyme systems. Particular attention is devoted to enzyme properties in immobilized cells and the properties of the carrier. The volume should provide the reader with a comprehensive overview of the subject, together with copious references. As well as serving as a research monograph, it could be used to provide reference material for a graduate course. Special thanks are due Mrs. JENNIFER KERBY for her dedicated work in the preparation of the manuscript, and IT-CHIN HSIEH for bibliographical assistance. COLIN R. PHILLIPS Toronto, July 1988 YIU C. POON v Table of Contents 1 Introduction. 1 References . 9 2 Methods of Cell Immobilization 11 2.1 Mechanical Immobilization . 11 2.1.1 Mycelial Pellet and Mat 11 2.1.2 Encapsulation .. 48 2.1.3 Dialysis Culture. . . 49 2.1.4 Entrapment. 50 2.2 Covalent Attachment 61 2.3 Ionic Attachment 62 2.3.1 Flocculation 62 2.3.2 Adsorption . 64 References . 66 3 Special Problems and Extended Applications . 75 3.1 Special Problems and Techniques .

From reader reviews:

Maria Saad:

What do you concerning book? It is not important together with you? Or just adding material when you really need something to explain what the one you have problem? How about your extra time? Or are you busy particular person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They must answer that question since just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on guardería until university need this kind of Immobilization of Cells (Biotechnology Monographs) to read.

Cari Sexton:

As people who live in the particular modest era should be revise about what going on or info even knowledge to make these people keep up with the era and that is always change and advance. Some of you maybe can update themselves by studying books. It is a good choice for you personally but the problems coming to an individual is you don't know what type you should start with. This Immobilization of Cells (Biotechnology Monographs) is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Angelica Adams:

Can you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you never know the inside because don't evaluate book by its cover may doesn't work at this point is difficult job because you are afraid that the inside maybe not while fantastic as in the outside appear likes. Maybe you answer might be Immobilization of Cells (Biotechnology Monographs) why because the excellent cover that make you consider regarding the content will not disappoint you actually. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly show you to pick up this book.

Elizabeth Givens:

Don't be worry if you are afraid that this book will filled the space in your house, you might have it in e-book technique, more simple and reachable. This kind of Immobilization of Cells (Biotechnology Monographs) can give you a lot of close friends because by you checking out this one book you have factor that they don't and make a person more like an interesting person. This book can be one of one step for you to get success. This publication offer you information that perhaps your friend doesn't learn, by knowing more than various other make you to be great persons. So , why hesitate? We need to have Immobilization of Cells (Biotechnology Monographs).
