User-Centred Requirements Engineering Alistair Sutcliffe

If you have picked up this book and are browsing the Preface, you may well be asking yourself "What makes this book different from the large number I can find on amazon. com?". Well, the answer is a blend of the academic and the practical, and views of the subject you won't get from anybody else: how psychology and linguistics influence the field of requirements engineering (RE). The title might seem to be a bit of a conundrum; after all, surely requirements come from people so all requirements should be user-centred. Sadly, that is not always so; many system disasters have been caused simply because requirements engineering was not user-centred or, worse still, was not practised at all. So this book is about putting the people back into computing, although not simply from the HCI (human-computer interaction) sense; instead, the focus is on how to understand what people want and then build appropriate computer systems.

From reader reviews:

Sandy Gonsalves:

Throughout other case, little people like to read book User-Centred Requirements Engineering. You can choose the best book if you'd prefer reading a book. So long as we know about how is important any book User-Centred Requirements Engineering. You can add information and of course you can around the world by the book. Absolutely right, mainly because from book you can understand everything! From your country until eventually foreign or abroad you may be known. About simple factor until wonderful thing you are able to know that. In this era, we can open a book or perhaps searching by internet unit. It is called e-book. You may use it when you feel uninterested to go to the library. Let's study.

Jay Blanchard:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you personally is User-Centred Requirements Engineering this book consist a lot of the information of the condition of this world now. This book was represented how does the world has grown up. The language styles that writer use for explain it is easy to understand. The writer made some study when he makes this book. This is why this book ideal all of you.

Louise Hawkins:

As a university student exactly feel bored to help reading. If their teacher asked them to go to the library in order to make summary for some publication, they are complained. Just very little students that has reading's heart and soul or real their hobby. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring in addition to can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this User-Centred Requirements Engineering can make you experience more interested to read.

Adam Mathews:

What is your hobby? Have you heard in which question when you got learners? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And you also know that little person such as reading or as studying become their hobby. You should know that reading is very important and book as to be the factor. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You find good news or update regarding something by book. Numerous books that can you take to be your object. One of them is User-Centred Requirements Engineering.
