**Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric North Carolina** Dale L. Hutchinson

"A fascinating picture of human adaptation in an area of North America that has been studied primarily by archaeologists . . . [that] provides a new understanding of the responses in health and lifeways in a coastal setting, showing especially the very localized nature of food choices and resource acquisition."--Clark S. Larsen, Ohio State University

"This thoughtful integration of archaeological, historical, ecological, and human bioarchaeological data provides a significant new perspective on the biological costs and benefits of Middle and Late Woodland coastal adaptations in North Carolina. By contrasting inner and outer coastal plain communities in terms of specific features of their dietary regimes, subsistence activities, and patterns of skeletal development and pathology, Hutchinson reveals a breadth of successful adaptive variations hitherto obscured by generalized summaries of Late Prehistoric Native American lifeways in the mid-Atlantic region."--Mary Lucas Powell, University of Kentucky

Dale Hutchinson provides a detailed bioarchaeological analysis exploring human adaptation in the estuary zone of North Carolina and the influence of coastal foraging during the late prehistoric transition to agriculture. He draws on observations of human skeletal remains to look at nutrition, disease, physical activity, morbidity, and mortality of coastal populations, focusing particularly on changes in nutrition and health associated with the move from foraging to farming.

Hutchinson confronts the prevailing notion of a universal agricultural transition by documenting a more variable and complex process of change. Among his notable findings is that skeletal and dental markers long accepted as indicators of corn consumption in fact occur more frequently among coastal foragers than among interior agriculturalists. His research shows that men and women differed not only in their economic roles but in their diets as well, and that outer coastal populations continued to rely on maritime resources without the adoption of corn after A.D. 800, a reliance that almost surely influenced their evolving lifestyle.

None of the data in the book has been published previously, and Hutchinson is generous with tables, figures, and appendixes that contribute significantly to the clarity of his interpretations. The combination of original data, well-supported interpretation, and the breadth of evidence from many categories significantly advances our anthropological understanding of the lives of these first North Carolinians.

Dale L. Hutchinson is associate professor of anthropology at East Carolina University.

### **From reader reviews:**

#### **Joseph Felix:**

Reading a guide tends to be new life style on this era globalization. With studying you can get a lot of information that may give you benefit in your life. Together with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story or their experience. Not only the story that share in the books. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors nowadays always try to improve their ability in writing, they also doing some analysis before they write to the book. One of them is this Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric North Carolina.

#### **Dominick Tran:**

Is it you actually who having spare time in that case spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric North Carolina can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these publications have than the others?

#### **Rex Oswald:**

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many issue for the book? But virtually any people feel that they enjoy regarding reading. Some people likes reading, not only science book but in addition novel and Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric North Carolina or others sources were given expertise for you. After you know how the fantastic a book, you feel desire to read more and more. Science e-book was created for teacher or even students especially. Those guides are helping them to bring their knowledge. In various other case, beside science publication, any other book likes Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric North Carolina to make your spare time far more colorful. Many types of book like this.

#### **Jonathan Leake:**

E-book is one of source of knowledge. We can add our understanding from it. Not only for students but in addition native or citizen need book to know the update information of year to year. As we know those guides have many advantages. Beside all of us add our knowledge, can bring us to around the world. By the book Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric North Carolina we can acquire more advantage. Don't you to definitely be creative people? To become creative person must choose to read a book. Just simply choose the best book that suitable with your aim. Don't always be doubt to change your life at this book Foraging, Farming, and Coastal Biocultural Adaptation in Late Prehistoric

North Carolina. You can more attractive than now.
