Business As a System of Power (Classic Reprint) Robert A. Brady

Particularly when long-established institutional systems have been breaking up under them have they tended to mistake symptom for cause and to greet predictions of major change with incredulity and aversion. In the main, they wrestle with obvious immediacies in familiar terms; for the rest, the deeper tendencies, they prefer to wait and see. If such a policy has seemed to be not without some justification in more leisurely eras of change, it is today nothing less than disastrous. For we are living through one of the great climactic eras of history, a major faulting of the institutional crust. A symptom of the extent of current change is the extreme ideological confusion. Fascist monopoly capitalism adopts National Socialism ;organized industry opposes organized labor in the name of democracy ;and ideological opposites fight side by side for goals that sound alike only because they are left vague. In such a time, when men and their most cherished concerns are being dragged headlong at the heels of confused events, the one chance for constructive recovery of control lies in the diagnosis of underlying causes. In this book Dr. Brady cuts through to the central problem disrupting our world, the most dangerous issue democracy faces. This problem is not basically created by Adolf Hitler and the Axis nations, but by the organized economic power backing the Hitlers in nation after nation over the industrial world as a device for shoring up for yet a while longer a disintegrating economic system.
